Re: Mountain Ash Limited Partnership, Summit Pit Project
Application: PL20200031-4

This is a letter of support for Mountain Ash Limited Partnership's proposed Summit Pit in our area. We are in favour of this development as we believe if we must have more gravel extraction in this area, this is an appropriate place for it. Our reasons are as follows:

- It's our understanding that there is another application in process that is adjacent to the Summit property and another across the highway. It makes sense to cluster these applications to avoid dispersed entry and exit points. For traffic safety reasons, hopefully a service road and intersections can be shared between these pits.
- The area surrounding the project site already includes business land uses such as natural resource, industrial, oil and gas wells and highway business development, with a very small number of residences close to these applications.
- It makes sense to approve applications that are close together rather than scattered throughout the area, thus having the least possible impact on residents due to gravel pit operations, traffic, etc.
- There is a demonstrated need for aggregate resources in the region and this project helps meet market demand.

Thank you.
