Re: Summit Aggregate Application

Application: PL2015-0100, PL2015-0101

This is a letter of support for the proposed Summit Gravel Pit in our area. We are in favour of this development as we believe if we must have more gravel extraction in this area, this is an appropriate place for it. Our reasons are as follows:

1. It's our understanding that there is another application coming that is adjacent to the Summit property and another across the highway. It makes sense to cluster these applications so that they can have shared entry and exit points. For traffic safety reasons, hopefully, a service road and one intersection can be used by all these pits.
2. There are a very small number of residences close to these applications.
3. It makes sense to approve applications that are close together rather than scattered throughout the area, thus having the least possible impact on residents due to gravel pit operations, traffic, etc.
